DVM

HPHT ULTRA HIGH ACCURACY SIMULTANEOUS DENSITY AND VISCOSITY MEASUREMENT

- Single instrument for both density and viscosity measurement to extremely high accuracy
- Measure reservoir fluid density and viscosity at 30,000 psi and 400 °F
- Less than 0.7 cc fluid sample required for measurement
- No hardware or software changes to measure density and viscosity across complete range
- All Titanium Grade 5 wetted parts, built in high-accuracy fluid temperature measurement

Specifications

Fluid Measurements

Viscosity Range	0.2 to 300 cP <small>lower than 0.2 available</small>
Viscosity Accuracy	0.1 cP below 1 cP 5% of reading (standard) <small>higher accuracy available</small>
Density Range	0–1.5 g/cc
Density Accuracy	0.001 g/cc <small>higher accuracy available</small>
Reproducibility	Better than 1% of reading
Temperature	Pt1000 (class AA)

Calibrated to NIST traceable viscosity and density standards.

Operational Environment

Process Fluid Temperature	-40 up to 200 °C
Ambient Temperature	-40 up to 200 °C
Pressure Range	up to 30,000 psi

Mechanical

Material (Wetted parts)	Titanium Grade 5
Dimensions	44 x 55 x 75.3 mm
Process Connection	1/4" HP (9/16-18 UNF)
Ingress Protection	IP69
Electrical Connection	Fixed cable

Electronics & Communication

Analog output	4-20 mA (3 channel) <small>{Viscosity, Density, Temp.}</small>	Display	Multi-line LCD <small>(SME-TRD)</small> <small>(max. 55°C)</small>
Digital output	Modbus RTU (RS-485) Ethernet USB	Operational temp.	max. 55 °C
Wireless output	Bluetooth LE 4.0	Power supply	24 V DC
		SME-TR(D)	IP65/66
		SME-DRM	IP40/50
		Software	Data acquisition and service control panel iOS and Android app

rheonics

DVM-DS-1706

Operating principle

The rheonics DVM measures viscosity and density by means of a torsional tuning fork resonator with flattened tine ends, which is immersed in the fluid under test. The more viscous the fluid, the higher the mechanical damping of the resonator, and the denser the fluid, the lower its resonant frequency. From the damping and resonant frequency, the density and viscosity may be calculated by means of rheonics' proprietary algorithms. Thanks to rheonics' coupled torsional resonator design (US patent number 9518906), the transducer is perfectly balanced, while maintaining excellent mechanical isolation from the sensor's mounting.

Damping and resonant frequency are measured by the rheonics sensing and evaluation electronics (US patent number 8291750). Based on rheonics' proven gated phase-locked loop technology, the electronics unit offers stable and repeatable, high-accuracy readings over the full range of specified temperatures and fluid properties.

Application

PVT and coreflood studies

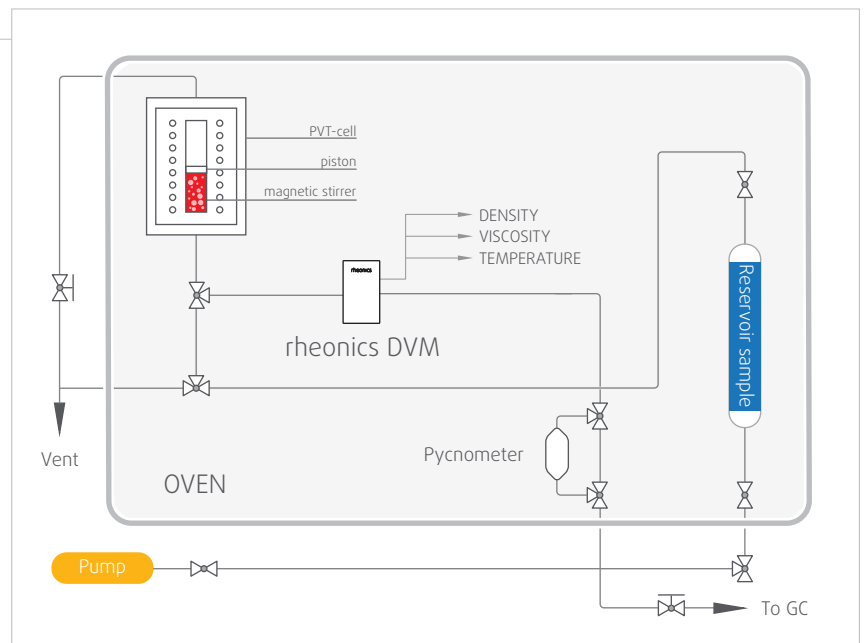

- Highly accurate and reliable density measurement at pressure to 30,000 psi and temperature to 400 °F
- Complete DVM sensor unit rated for up to 200 °C temperature for installation in PVT oven or bath
- Fully automated inline high pressure and high temperature density meter and viscometer
- Live oil viscosity (dynamic and kinematic) and density measurement in combination with high pressure sample cylinders and high pressure pump
- Improve crude oil separation and recovery from wells by understanding behavior of reservoir fluid through multistage separators under operation pressure and temperatures of each stage
- Stable and repeatable measurements of fluid property of foamed systems under extreme conditions
- Gas viscosity at HPHT for flow modeling in porous media

Real-time scale deposition evaluation

- Evaluate the performance of scale and wax inhibitors at high pressure and high temperature

Oil fields fluids

- Viscosity measurement of completion fluids at high pressure and high temperature
- Inline real-time on location accurate measurement of fracturing fluid viscosity and density
- Long term HPHT viscosity monitoring of drilling mud to assess heat stress and thermal stability
- Continuous measurement - eliminate manual sampling

Other applications:

- Jet fuel, aerosols, adhesives, automotive fluids, coatings, colloids, dispersions
- High pressure diesel injector development
- Lubricant viscosity profile under operational high pressure and high temperature conditions
- Gas mixture specific gravity measurement under HPHT conditions
- Simulation of deepwater conditions. Pipeline and umbilical restart tests
- Stability tests of emulsions for non-newtonian and newtonian fluids
- Small form factor for direct installation in flow lines

Mechanical & Electrical

Electronics (select between)

SME-TRD

SME-TR

- Explosion-proof IP66 enclosures
- Onsite and remote installation of electronics head
- Available with and without rugged display for field use

SME-DRM

- 35mm DIN rail mount
- Extra-small form factor for easy installation
- Ethernet connection
- External adapters for wifi

Mechanical

- Titanium Grade 5
- Complete unit including cable and connector on DVM rated for up to 200 °C insertion in fluid bath

Process connection

- 1/4" HP (9/16-18 UNF) (standard)
- Custom connections and adapter

Ordering

Ordering code example

DVM	V1	STD	D1	DCAL1	E1	C1,C2	T1	P1	X1
	Viscosity range	V. Calibration	Density range	D. Calibration	Electronics	Communication	Temperature	Pressure	Process Connection

Order code	Name	Short description
Viscosity range (select all)		
V1	0.2 - 300 cP	Standard calibrated range
V2	custom	Customer specified calibration range (0.02 to 500 cP)
Viscosity Calibration (select all)		
STD	Standard calibration	
CUS	Customer specific calibrations - specify viscosity range, accuracy required and operational conditions	
Density range (select all)		
D1	0 - 1.5 g/cc	Standard range
D2	custom	Customer specified range (max. 3 g/cc)
Density Calibration (select all)		
DCAL1	0.001 g/cc	Standard calibration accuracy
DCAL2	0.0001 g/cc or better	Customer specific calibrations - specify density range, accuracy required and operational conditions
Electronics (select one)		
E1	SME-TRD	Explosion proof transmitter housing with display
E2	SME-TR	Explosion proof transmitter housing with solid cover
E3	SME-DRM	35mm DIN rail mount housing
Communication (select all)		
C1	4-20 mA	3 channels of 4-20 mA analog signal
C2	Modbus RTU (RS-485)	Modbus RTU over RS-485
C3	USB	USB 2.0 compliant service and data acquisition port
C4	Ethernet	Ethernet TCP/IP with RJ45 connector
C5	Bluetooth LE 4.0	Bluetooth module for short range communication, only available with display module
Temperature (select one)		
T1	125 °C	Sensor rated for operation in process fluids up to 125 °C (250 °F)
T2	150 °C	Sensor rated for operation in process fluids up to 150 °C (300 °F)
T3	175 °C	Sensor rated for operation in process fluids up to 175 °C (350 °F)
T4	200 °C	Sensor rated for operation in process fluids above 200 °C (400 °F)
Pressure (select one)		
P1	700bar (10,000 psi)	Sensor rated for process fluids pressure up to 700bar (10,000 psi)
P2	1000bar (15,000 psi)	Sensor rated for process fluids pressure up to 1000bar (15,000 psi)
P3	1400bar (20,000 psi)	Sensor rated for process fluids pressure up to 1400bar (20,000 psi)
P4	2100bar (30,000 psi)	Sensor rated for process fluids pressure up to 2100bar (30,000 psi)
Process Connection (select one)		
X1	1/4" HP (9/16-18 UNF)	Standard
X2	custom	Custom fluid connection

Accessories		
Torque wrench	20 N.m adjustable	Torque wrench to tighten the sensing element with correct torque (20 N.m)
Cable gland	1/2" NPT	1/2"NPT Standard and explosion-proof cable glands
Transmitter mounting bracket		Mounting bracket for SME-TR and SME-TRD transmitter housings
